

## FLDI NUTS DRYING, BREAKING AND GRADING LINE

Référence : FLLSCCFC

The FLDI nuts drying, breaking and grading line is a modular solution

### Description technique :

The FLDI nuts drying, breaking and grading line is a modular solution designed for:

- dry the nuts without their husks,
- break the dried fruit without shell,
- separate the seeds from their shells and skins,
- sort the seeds that you want to exclude from sale,
- calibrate seeds intended for marketing.

In terms of harvesting, the FLDI group can also assist you in optimizing your machine in order to match it as closely as possible to your expectations and your performance objectives. Each module can be sold independently. Do not hesitate to contact us.
