

ADJUSTABLE ACCESS PLATFORM

Référence : FLRDCNP

This equipment is integrated into a production line in order to set up an operator workstation. The dimensions of the walkways automatically adapt to its dimensions.

Description fonctionnelle :

Total mass: 38 tonnes

Number of mechanical parts: 7676

Number of PLC I / Os: 80

Safety PLC (safety level SIL3 PLe)

Simplified control via 10-inch touchscreen HMI

Automated management by PLC and I / O in fieldbus

Control and adjustment of flatness

Mobile Home format detection

Management of operating times for maintenance

Zone control cameras

Optimized cycle time

Description technique :

Height adjustment Loading materials at ground level Clearance for product transfer Variable length: 5-12m. Variable width: 3-5m. Variable height: 0-4m.
